Seminar Overview

The seminar starts with an introduction to booms and busts, explaining how capital markets, economies, politics and public policy are all interconnected. Then we look at the current state of global capital markets (equity, property and debt) and the global economy, with a strong emphasis on the monetary system. It's all about demonstrating where we are now and what lies ahead.

Then we get down to the practical side of things. This is the checklist. How to protect existing wealth, including the dangers older investors face and also younger Australians. We need to anticipate asset devaluation, inflation, unemployment, rising interest rates and more political (and policy) uncertainty. And we can profit in a decline but we need to be very careful of how we go about it.

In detail

Part 1

- Capital markets and how they relate to the economy/political system
- Why some Stockmarket booms in a crash and others don't
- Boom & bust cycles and why crashes don't cause economic failure
- Historical examples of major booms & busts, including the roaring 20s
- Understanding cause and effect and why we vote out the establishment

Part 2

- The current state of global equity, property and debt markets
- Why we're stuck with low interest rates and the asset inflation it has caused
- An historical look at the U.S. monetary system and its gradual erosion
- The economic dangers the world is currently facing
- The dangers we are facing in Australia

Part 3

- What we need to be doing now to prepare for what lies ahead
- Profiting and protecting our capital/assets as the downcycle begins
- Profiting and protecting our capital/assets at the peak of the downcycle
- Profiting and protecting our capital/assets at the bottom of the downcycle
- General considerations such as currency movements and investing offshore

Format

Once your application form is processed you will receive your access details (by email) for the Members section of the website. Here you will have access to the following :

- *Online streaming videos (3 videos approximately 60 minutes each)
- Downloadable Notes (as pdfs) for each Part
- Downloadable audio (as mp3 files) for each video

****Please note that the videos are streaming only and you must be connected to the internet to view them.***
